For June. 1858.

INENDATION.—The Mississippi river at this point is now nbout as high as it has been during the season, and is still rising. It is still on the rise above, and we have the most melancholy tidings of the overflow below. We presume the continued rains will swell the vast volume of the Mississippi to early an extent that it will inundate the whole country below for many hundred miles. The aspect of things at New Urleans about this time is fearful in the extreme. Much of the country on either side of the river below slopes downward from the river bank, and thus, when a breach occurs in the latter, the prodigious flood pouring through the gap flows even faster than the ordinary rapid run of the atream, and descending into the great broad valley, spreads out over n vast surface. In the New Orleans Delta of last Friday evening, we find the following. The Dalta, no doubt designedly, treated the matter as a joke. Its reality has some made itself manifest:

The Populamer Committee—It having been white pered about for some time part, among those who profess to be knowing ones, that a Vigilance Committee, after the Californis style, was secretly being organized in our city, some wag, thinking it a good opportunity for fragittening some of the "b'hoys," directed a large number of notices through the post office this morning, purporting to have emanated from the Committee, warning them to mend their ways or prepare to swing.
